Gentlemen:

SUBJECT: NRC INSPECTION 50-445/92-46; 50-446/92-46

This refers to the inspection conducted by Dr. D. Blair Spitzberg, and other members of an NRC team during the period November 16-20, 1992. The inspection included a review of activities authorized for your Comanche Peak Steam Electric Station facility. At the conclusion of the inspection, the findings were discussed with Mr. M. R. Blevins and members of your staff identified in the enclosed report.

Areas examined included the implementation of your emergency plan and procedures during your annual emergency exercise. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. The inspection findings are documented in the enclosed inspection report.

Within the scope of this inspection, no violations or deviations were identified.

In general, your performance during the exercise demonstrated that your emergency response organization was prepared to protect the health and safety of the public during an emergency. Three exercise weaknesses were identified, however, during the inspection. One weakness discussed in Section 6.1 of the enclosed inspection report related to weak emergency command and control. The two remaining weaknesses are discussed in Section 3.1 and concern delays in detecting and classifying emergency conditions and in making notifications to offsite authorities.

Exercise weaknesses according to 10 CFR Part 50, Appendix E.IV.F.5, are inspection findings that need to be corrected by the licensee. You are requested to provide this office with a description of your corrective

measures and your schedule for completing these actions within 30 days after receipt of this letter.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

A. Bill Beach, Director
Division of Reactor Projects
