LIC. FILE MGMT. BRANCH

With reference to the letter of April 15, 1985, by D.G. Wiedeman, (copy attached) we wish to submit the attached application form for a new license to continue our program of using standard Ni-63 Detectors on our gas chromatographic equipment. The equipment is not currently in use and we will not use it until we receive a new NRC license.

Dr. Addison and I have performed a complete review of our program to include all sources and activities related to radioactive materials in the Science Division at Governors State University. If there are any questions related to this application, please do not hesitate to contact me. Thank you for your attention to this matter and we are sorry for the delay.

Sincerely,

Edwin D. Cehelnik
