License No. 12-14954-02  
Expiration Date: February 28, 1985

Gentlemen:

Subject: Notice of Violation

NRC records show that the Byproduct Material License identified above expired on February 28, 1985, and that no renewal application was filed in accordance with Section 30.37 of Title 10, Code of Federal Regulations, Part 30.

From our discussion with you on April 4, 1985, we learned that you still possess material which requires a specific NRC License. Your possession of that material without a valid, specific license is a violation of Section 30.3, 10 CFR Part 30.

IF YOU WANT TO CONTINUE YOUR PROGRAM, YOU MUST IMMEDIATELY SUBMIT THE ENCLOSED FORM NRC 313, "Application for Byproduct Materials License" to the Regional Licensing Section, U.S. Nuclear Regulatory Commission, 799 Roosevelt Road, Glen Ellyn, Illinois 60137, Attention: Bruce S. Mallett, Ph.D.

Since your present license has expired, your application for renewal will be processed as a request for a new license. Accordingly, you must determine if your program is subject to a license fee as required by Section 170.31, 10 CFR Part 170. If so, submit the appropriate fee along with the application.

Also, you must place the radioactive material on hand in secure storage until such time as you acquire a valid license. No other use of the material on hand or purchase of additional byproduct material is authorized.

If you decide not to reactivate your program you should do the following:

1. Dispose of all material possessed under this license. Disposal must comply with the requirements of 10 CFR 20.301 and with the requirements, if any, of your license.
2. Complete the enclosed Form NRC-314, "Certificate of Disposition of Material." Describe what material was involved and when the material was disposed of or transferred.
3. RETURN THE COMPLETED FORM NRC-314 TO THIS OFFICE WITHIN TWENTY-FIVE DAYS of the date of this letter, so that we can close out our files on this expired license.

CONTROL NO. 78800

APR 15 1985

If the activities conducted under the expired license were subject to the reporting activities of 10 CFR 20.407, 20.408, or 19.13, please submit any outstanding reports as described in those regulations.

If you have any questions, please contact Rose Douglas at (312) 790-5735.

Sincerely,

A handwritten signature in dark ink, appearing to read 'D. G. Wiedeman', is written over the typed name.

D. G. Wiedeman, Chief  
Nuclear Materials Safety  
Section 1
