

DEC 04 1992

Docket Nos. 50-336  
50-423

Mr. John F. Opeka  
Executive Vice President - Nuclear  
Northeast Nuclear Energy Company  
P. O. Box 270  
Hartford, Connecticut 06141-0270

Dear Mr. Opeka:

SUBJECT: INSPECTION REPORT NOS. 50-336/92-29 AND 50-423/92-26

This refers to the inspections conducted by Messrs. J. Carrasco and P. Patnaik of this office on October 19-23, 1992 and November 3-6, 1992, respectively, at the Millstone Station, Units 2 and 3 in Waterford, Connecticut. Discussions of our inspection findings were held by Messrs. Carrasco and Patnaik with the members of your staff on October 23 and November 6, 1992, respectively, at the conclusion of their inspections.

These inspections were intended to assure public health and safety, and included review of the inservice inspection program, and the snubber surveillance program for the safety-related systems. These are important aspects of maintaining pressure boundary integrity of safety-related piping. For those aspects of the foregoing programs that were reviewed, the inspections found the inservice inspection and the snubber surveillance programs to be effective.

Within these areas, the inspections consisted of selective examination of procedures and representative records, interviews with personnel and observations by inspectors. Within the scope of this inspection, no violations were observed and therefore, no response to this letter is required.

Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By  
Jacque P. Durr

Jacque P. Durr, Chief  
Engineering Branch  
Division of Reactor Safety
