PROTECTIVE PACKAGING DIVISION

December 12, 1979

Refer to: PPI-JWM-200

United States Nuclear Regulatory Commission
Washington, D.C. 20555

Attn: Mr. Charles E. McDonald
Chief, Transportation Branch
Division of Fuel Cycle and
Material Safety, NMSS

Gentlemen:

Teledyne Energy Systems, prior to 1979, had established a Quality Assurance program relative to its activities at that time. Subsequently, the acquisition of Protective Packaging, Inc. as a Division of Teledyne Energy Systems introduced a new series of activities which were not covered by the existing manual. To further complicate matters, the procedures and organization outlined in the Protective Packaging QA manual were no longer valid as such, owing to the relocation.

We have since formulated a new QA program, intended to regulate and control the activities of the Protective Packaging Division within the framework of Teledyne Energy Systems, and in accordance with 10CFR71. These include design and fabrication of radioactive waste processing and solidification systems, as well as the design and fabrication of existing approved packages and new packages to meet future requirements.

Accordingly, the QA manual for the Protective Packaging Division of Teledyne Energy Systems is submitted for your review.

Very truly yours,

J. W. McGrew
