Docket No. 50-219

LICENSEE: GPU Nuclear Corporation

FACILITY: Oyster Creek Nuclear Generating Station

SUBJECT: SUMMARY OF PROGRESS REVIEW MEETING REGARDING STATUS OF
LICENSING ACTIONS

On Wednesday, November 18, 1992, a meeting was held at the NRC Headquarters, One White Flint North, Rockville, Maryland with GPU Nuclear Corporation (GPUN, the licensee) to discuss the status of Oyster Creek licensing actions. Enclosure 1 is the list of individuals participating in the discussion.

Enclosure 2 is a marked-up copy of the staff's Project Manager Report (PMR) dated November 17, 1992, for Oyster Creek. The markup to update PMR resulted from the discussion on each item or TAC number in this meeting. The status of each item is given in the last column on the right-hand side of the PMR sheets. The status in that column is the following: "01" means the licensee, "02" means staff reviews, "03" means staff's Project Manager and "04" means complete.

The updating of the PMR for Oyster Creek was done during the discussion on each licensing action in this meeting. The licensing action items are listed by TAC number (left-hand column of PMR.)

The licensee requested that our review regarding Containment Spray System modifications and feedwater nozzle inspections be expedited. With respect to the Containment Spray System modifications, we indicated that the amendment should be issued within 3 weeks and that the SE regarding the feedwater nozzles should be issued within 2 weeks.
