Marketing Representative

Gentlemen:

This refers to your November 10, 1992, request for an exemption to sell a general licensee a device currently for distribution under specific license only. Your request will be processed as an amendment to Materials License 29-28654-01.

Enclosed is a copy of the July 23, 1992, **Federal Register** notice containing the Commission's revised fee regulations which went into effect August 24, 1992. Footnote 1(d)(2) of 10 CFR 170.31 states that "An application for amendment to a materials license or approval that would place the license or approval in a higher fee category or add a new fee category must be accompanied by the prescribed application fee for the new category." Your request would increase the scope of your licensed program to include fee Category 3J of 10 CFR 170.31, for which an application fee of \$2,700 is required. Fee Category 3J is applicable to licenses authorizing distribution of devices to general licensees.

The Office of Nuclear Materials Safety and Safeguards (NMSS), however, has informed us that the level of review necessary for your request is not that typically required for a new distribution license, but rather will be similar to a review of an amendment to a license authorizing distribution to general licensees. Additionally, NMSS has indicated that the authorization, if granted, will be of short duration to accommodate your specific customer's requirements.

Based on the information provided by the Office of Nuclear Materials Safety and Safeguards, and pursuant to 10 CFR 170.11(b) of 10 CFR 170, the Commission hereby grants a partial exemption from the license fee with respect to your November 10, 1992, request, having determined that such an exemption is authorized by law and is otherwise in the public interest. The Commission has determined that the appropriate fee for your request is \$420, which is the amendment fee specified in fee Category 3J.
