and Engineering Response
Office of Inspection and Enforcement
Nuclear Regulatory Commission

FROM: *Richard W. Krimm*
Richard W. Krimm
Assistant Associate Director
Office of Natural and Technological
Hazards Programs

SUBJECT: Remedial Exercise for the Peach Bottom Atomic
Power Station

Attached are two copies of the exercise evaluation report of the offsite radiological emergency preparedness remedial exercise conducted on April 10, 1985. This remedial exercise was conducted to correct the two Category A deficiencies cited at the Peach Bottom full-participation offsite radiological emergency preparedness exercise conducted on October 17, 1984. The deficiencies cited in Pennsylvania were: two Lancaster County municipalities, Drumore and Little Britain Townships, did not allow Federal observation of their operations; and two York County municipalities, Fawn Grove Borough and Fawn Grove Township, which operate a joint emergency operations center, did not demonstrate that adequate protective measures could be taken to protect the health and safety of the public in the vicinity of the Peach Bottom Atomic Power Station.

As a result of the remedial exercise conducted on April 10, 1985, Drumore and Little Britain Townships demonstrated an adequate capability to implement their offsite radiological emergency preparedness plans; and Fawn Grove Borough/Fawn Grove Township adequately activated their joint emergency operations center and implemented the offsite plans, thus eliminating the Category A deficiencies cited during the October 17, 1984, exercise.

Based on the results of the remedial exercise, offsite radiological emergency preparedness is now adequate to protect the health and safety of the public in the event of an accident at the Peach Bottom Atomic Power Station.

Should you have any questions, please contact Mr. Robert S. Wilkerson, Chief, Technological Hazards Division, at 646-2861.
