

APPENDIX

NOTICE OF VIOLATION

Department of the Army
Ft. Worth, Texas 76102-0300

Docket No. 030-14636
License No. 42-18191-01

During an NRC inspection conducted on November 10, 1992, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C, the violation is listed below:

License Condition 19 requires, in part, that the licensee conduct its program in accordance with statements, representations, and procedures contained in an application dated May 12, 1988.

Item 10, Section 5 of Enclosure No. 7 of the application dated May 12, 1988, states that each location using licensed material will maintain a radiation survey meter capable of detecting beta and gamma radiation.

Contrary to the above, the licensee did not maintain radiation survey meters at several locations during 1992.

This is a Severity Level IV violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, Department of the Army is hereby required to submit a written statement or explanation to the Regional Administrator, Region IV, with a copy to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. If an adequate reply is not received within the time specified in this Notice, an order or demand for information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Dated at Arlington, Texas
this 7th day of December, 1992
