Project No. 674

Mr. Stephen P. Sands
Project Manager
Advanced Reactors Project Directorate
Associate Directorate for Advanced
Reactors and License Renewal
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Sands:

In response to your request, dated August 13, 1992, I am enclosing a copy of General Electric Company's report "Reliability, Availability, and Maintainability Program Plan" - GEFR-00843, dated April 1989. As you indicated in your letter, the contents of the report are to assist your staff to complete the steam generator system functional design review. As noted with previous report transmissions, the publication is marked "Applied Technology" to control circulation in accordance with Federal Regulation 10 CFR Part 810.

Sincerely,

Nicholas Grossman
Director, Division of LMRs and Breeders
Office of Advanced Reactor Programs
Office of Nuclear Energy
