PLANT HATCH - UNIT 2
NRC DOCKET 50-366
OPERATING LICENSE NPF-5
GENERIC LETTER 89-10, SUPPLEMENT 3
COMPLETION OF MOV MODIFICATIONS
(TAC NO. M77779)

Gentlemen:

By letter dated December 11, 1990, Georgia Power Company (GPC) responded to Generic Letter (GL) 89-10, Supplement 3, regarding the capabilities of motor-operated valves on certain high energy lines. In that letter, GPC committed to implementing modifications to the motor-operated isolation valves for the high pressure coolant injection, reactor core isolation cooling and reactor water cleanup systems during the Fall 1992 Unit 2 refueling outage. These modifications have been implemented. This completes actions required by GL 89-10, Supplement 3 for Plant Hatch Unit 2. As stated in GPC letter dated March 15, 1991, modifications to the subject motor-operated isolation valves on Unit 1 will be implemented during the Unit 1 refueling outage currently scheduled for Spring of 1993.

If you have any questions in this regard, please contact this office.

Sincerely,

J. T. Beckham, Jr.
