PETITION RULE PRM-71-7(43FR25749)

U.S. Nuclear Regulatory Comm.
Washington, D.C. 20555

Attn: Docket & Service Branch

Gentlemen:

Your recent delay of regulation Appendix E, Part 71, Chapter 1 Title 10 was most welcomed. A complete abandonment of the proposed regulation would be for the best interest of the industry in view of the past safety record. Unnecessary regulations, without a basis for implementation, is one of the last things we need.

We stand opposed to this regulation.

Sincerely,

Q A SPECIAL SERVICES, INC.

Paul Granier
