DOCKET NUMBER

PETITION RULE PRM-71-(28) (43FR25749)

August 8, 1978

Mr. Samuel Chilk
Secretary of the Commission
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sir,

This company and its management request the immediate removal of Appendix E to 10CFR Part 71. Our reasons for this request are that there has been no proof of necessity for further regulations.

American industry is already so burdened with useless regulations that we can no longer be competitive in the world market place. We feel that we need your assistance in streamlining licensing and regulations instead of additional rules.

Sincerely,

E. G. Bryant
