(313) 360-3300

Gary L. Shear, Chief
Nuclear Regulatory Commission
799 Roosevelt Rd.
Glen Ellyn, IL 60137

Dear Mr. Shear,

This letter is in response to violations identified during the routine safety inspection conducted by Mr. Michael Kurth on August 10, 1992 and per your letter of August 27, 1992.

All items of violation have been, or shall be corrected as detailed:

VIOLATION

CORRECTIVE ACTION

- | | |
|--|---|
| 1. Ventilation rates must be measured every six months | At the time of inspection, we could not produce the necessary documentation that ventilation rates had been measured. In fact, the area was tested on 6/10/92 and the results are attached with this letter. |
| 2. Licensee does not provide training to ancillary staff whose duties require them to work in the vicinity of radioactive materials. | A training document has been created and is attached with this letter. Sections of the training program specific to each ancillary department have been identified by the Radiation Safety Officer and an inservice program will be completed within 60 days.

<u>Expected date of completion: Nov 30, 1992</u> |
| 3. Off duty deliveries of radioactive materials are accepted | Huron Valley Hospital has requested an amendment to our materials license to allow deliveries after normal working hours at the Nuclear Medicine Department. A copy of the letter is attached. |

Please notify us if you have any questions or concerns about our response or plan of corrective actions. I may be reached at (313) 360-3440.

Sincerely,

Craig Schantz
Craig Schantz,
Administrative Director, Radiology
