Dallas, Texas 75201

Gentlemen:

SUBJECT: NRC INSPECTION REPORT 50-445/92-57; 50-446/92-57

This refers to the inspection conducted by Mr. J. E. Whittemore of this office on November 16-19, 1992. The inspection included a review of activities authorized for your Comanche Peak Steam Electric Station, Units 1 and 2, facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during this inspection are identified in the report. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and review of completed activities.

Within the scope of this inspection, no violations or deviations were identified. The scope and implementation of emergency, abnormal, and alarm procedures for Unit 2, including the associated administrative controls were acceptable and judged to be fully capable of supporting Unit 2 operation.

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

A. Bill Beach, Director
Division of Reactor Projects
