

DEC 8 1992

Docket No. 50-483

Union Electric Company
ATTN: Mr. Donald F. Schnell
Senior Vice President -
Nuclear
Post Office Box 149-Mail Code 400
St. Louis, MO 63166

Dear Mr. Schnell:

This refers to the inspection conducted by Messrs. M. P. Huber and J. F. Smith of this office on November 2 through 20, 1992. The inspection included a review of activities for your Callaway Nuclear Power Plant. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

The areas examined during the inspection are identified in the report. These areas consisted primarily of a review of the Callaway Nuclear Power Plant's program for inservice testing of pumps and valves established in response to Generic Letter 89-04 and of the activities regarding the performance of check valves. Within this area, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No violations of NRC requirements were identified during the course of this inspection. However, as a result of this inspection, the Callaway engineering staff has committed to update the testing of certain valve position indicating lights on motor control centers.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

[Signature]

M. A. Ring, Chief
Engineering Branch
