RE: License Number: 29-15035-01

Dear Dr. Glenn;

Thank you for giving me your time informing me concerning our Nuclear Medicine Department's doing a new procedure, vesico-ureteral reflux using Technetium. Following your suggestion, we contacted some of the manufacturers who informed us that performing vesico-ureteral reflux using Technetium is now approved and is contained in their inserts. I also mentioned to you, during our telephone conversation, that Mr. Robert West from the Food and Drug Administration has informed me, by phone, when I called him last month, that the FDA has given its approval for performance of gastroesophageal reflux using Sulfur Colloid. However, when we inquired from the manufacturers they mentioned to us that they have still not received any official communication from the FDA. Mr. West has sent us a form and application blanks to enable us, if approved, to perform gastroesophageal reflux and also to determine patency of visceral shunts using radioisotopes.

Enclosed you will find copies of curriculum vitae of Drs. Sherwin and Bocobo, who joined our department in July of last year and January of this year respectively. Please amend our license to include them as
