RETURN RECEIPT REQUESTED

Mr. John W. N. Hickey, Chief
Fuel Cycle Safety Branch
Division of Industrial and
Medical Nuclear Safety, NMSS
U. S. NUCLEAR REGULATORY COMMISSION
Washington, D.C. 20555

Re: License SUB-1010, Docket 40-8027
Ammonium Nitrate Fertilizer Program,
1991 Completion Report

Dear Mr. Hickey:

On May 1, 1992, Sequoyah Fuels Corporation (SFC) submitted to the Nuclear Regulatory Commission its 1991 Ammonium Nitrate Fertilizer Program Completion Report. This report is required by NRC License SUB-1010 to provide details of SFC's fertilizer application program for the previous year, and to also include a summary of the projected year's program. Due to an oversight, the 1991 report did not include the projected summary for the 1992 fertilizer application program.

Attached please find an amended report reflecting the 1992 projection, with corrections found on the following pages: 1) List of Appendices, 2) Page 1, and 3) Appendix 1. We have also included an additional 8 copies to replace the original distribution copies.

Should you have any questions, please contact Tom Blachly, Manager, Environmental, at 918/489-3298.

Sincerely,

John S. Dietrich
Vice President,
Regulatory Affairs
