2. Letter from OPPD (W. G. Gates) to NRC (Document Control Desk)  
dated November 13, 1992 (LIC-92-331)

Gentlemen:

SUBJECT: November 1992 Monthly Operating Report (MOR)

Enclosure 1 is the November 1992 MOR for Fort Calhoun Station (FCS) Unit No. 1  
as required by FCS Technical Specification Section 5.9.1.

Reference 2 submitted the October 1992 MOR for FCS. The first paragraph of the  
Operations Summary incorrectly stated that main turbine control valve position  
drift caused a variation of two to three MWt, corresponding to 0.00133 to 0.002%  
reactor power. As shown on the corrected page (Enclosure 2), the actual reactor  
power variation caused by the drift was 0.133 to 0.2%.

If you should have any questions, please contact me.

Sincerely,

*W. G. Gates*

W. G. Gates  
Vice President
