Dear Sir:

Enclosed you will find an application for a Byproduct Material License.

The story behind the application is that Cory Labs purchased a gas chromatograph without being aware that a license was needed for the detector.

Recently we sent the detector back to Varian for repairs (foil cleaning/replacement) and discovered- the hard way - that a license is needed for this device.

Things are at a standstill here until I get my detector. As such, could you please expedite this application?

Thanks.

If there are any problems please call me at 906-863-9336 as soon as possible.

Sincerely,

James A. Forst
