Re: Amdendment to radioactive materials license #21-18912-01

Gentlemen:

We are requesting several changes in our materials license:

1. Please add George J. Benisek, M.D., William L. Songer, M.D., and John P. Engels, M.D. as authorized users to our License for groups I, II and III. These physicians are presently listed on materials license #21-13230-01.
2. The name of the clinic has changed from Western Michigan Cardiovascular Disease Center to Cardiovascular Center, P.C.
3. The mobile gamma camera used for our mobile nuclear medicine service is housed in the room shown on the area diagram enclosed. Diagnostic exams are done approximately once per week in this room. This room is surveyed and wiped as a regular part of our survey routine. No other changes in our area layout hae occurred.

Any questions that need further clarification can be addressed to me at (516) 381-3963 or Mr. Tony Mason (Medical Physics Consultants) at (313) 662-3197,....

Sincerely,

E. Enrique Leguizamon, M.D.
Radiation Safety Officer
