

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

NOV 8 1984

MEMORANDUM FOR: Vandy L. Miller, Chief
Material Licensing Branch
Division of Fuel Cycle and
Material Safety, NMSS

FROM: Karl R. Goller, Director
Division of Radiation Programs
and Earth Sciences, RES

SUBJECT: PROPOSED RULEMAKING TO AUTHORIZE APPROVED
RADIOPHARMACEUTICALS FOR UNAPPROVED USES

As requested by your October 18, 1984 memorandum, we have reviewed the proposed rulemaking to amend 10 CFR 35.14(b)(7) to allow licensees to use certain FDA approved drugs for the listed uses. At the last FDA Advisory Committee meeting it was stated that FDA was in the process of authorizing additional clinical procedures for approved radiopharmaceuticals. Since nothing further has happened, it is appropriate for NRC to take the lead. We concur in the publication of your proposed revision.
