Docket No. 50-155
Docket No. 50-255

Gentlemen:

This refers to the meeting conducted on March 11, 1976, at our Regional office in Glen Ellyn, Illinois, by myself, Messrs. Fiorelli, Jordan and Hind with you, Messrs. Bilby, Sowell and DeWitt.

The topics of discussion related to noncompliance, licensee event reports, personnel training, plant modification reviews, general management controls and general plant performance at the Big Rock Point and Palisades nuclear facilities. Activities where improvement was noted as well as those warranting additional attention by Consumers Power corporate management were highlighted. Topics involving security matters are discussed in a separate communication to you.

Based on our meeting, it is our understanding that appropriate followup will be made to improve the controls related to personnel training, plant modification reviews, timeliness of problem resolution and corporate cognizance of plant problems. We will continue to follow these matters during subsequent inspections.
