Mr. Alan S. Rosenthal
Chairman Atomic Safety
and Licensing Board
US Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Rosenthal:

McGuire Nuclear plant is needed immediately. From what I have read nuclear power is more economical, and should be judged on its merit and not emotionalism.

Nuclear power is needed by the Piedmont - Carolinas and the United States, and the licensing of McGuire should be based on technical merits and not emotional scare tactics by anti-nukes.

Sincerely,

Glenn Johnston
