

DOCKET NUMBER PR-30, 32, 70, 150  
PROPOSED RULE (45 FR 70874)  
SMELTED ALLOYS

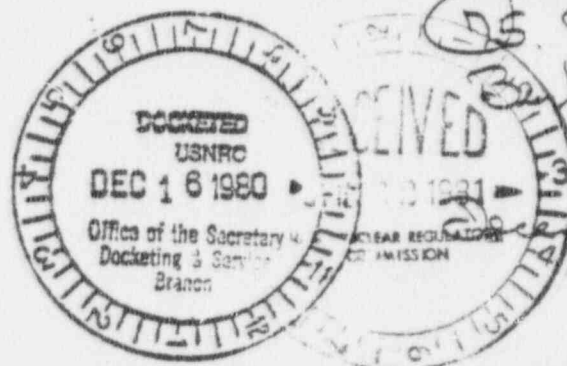

001816

Secretary of Nuclear Regulatory Commission:

I strongly protest the proposal to recycle radioactive metal. Radioactive metal must be disposed of, like all other radioactive wastes, in such a way as to cause the least possible harm now & in the future. The worst possible plan would be to disperse any radioactive material, includ radioactive metal out into general use.

Don't recycle radioactive metal.

Sincerely,  
Gudy Nakadegawa
