Atlanta, Ga. 30323

✓ Attention: Paul R. Guinn

Dear Mr. Guinn:

In reference to the attached license renewal for the use of a Campbell Pacific Nuclear Model MC Series Gauge for moisture/density measurements, the new license has a six month time interval for the performance of leak tests. Our original license had a time interval of twelve months. I hereby request that the time interval of our leak tests be changed from six months to twelve months as per our original license.

The above request is due to the small amount of time that we use our moisture/density gauge. Since the purchase of our gauge in 1982, we have used it approximately 15 to 20 days. In our operation the gauge is used solely as a check on projects when there is an apparent discrepancy with a soil's laboratory.

Your consideration of this request would be greatly appreciated.

Sincerely,

JACK L. MASSIE CONTRACTOR, INC.
