DOCKET NUMBER PR-30, 32, 70, 150  
PROPOSED RULE (45 FR 70374)  
SMELTED ALLOYS

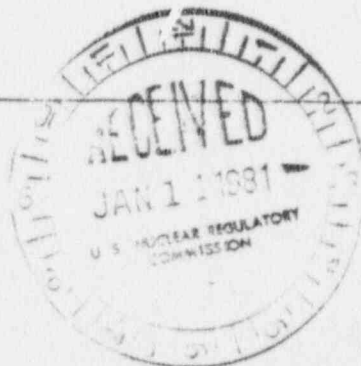

M. Secretary,

001915

These comments address

- the news release of Oct. 27, 1980,  
posted by the NRC in the Federal  
Register, which dealt with  
the idea of recycling ~~in~~  
radioactive metal wastes from  
uranium enrichment plants by  
mixing small amounts of these  
waste metals with metals  
destined for consumer products.

I strongly oppose the  
introduction of any radioactive  
material in any amounts into

L-4-1,14,30

8108050983

material used in manufacturing  
consumer products or any  
products. The damage already  
done is beyond comprehension.

The alternatives are available  
and proven, as in the  
case of Brazil's nation wide  
methane fuel effort.

We must discontinue the  
use of nuclear energy now.

Thank you.

Steve Pryputnielcz
