

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

8/17/82

Jim Dougan

Enclosed are some internal comments on the ANSI/ANS 56.8-1981 standard. These are input opinions only, and do not necessarily reflect eventual positions.

In addition, I have included for background purposes comments from EXTRAN, Inc. I will circulate them for internal review at a later date - probably together with a draft regulatory guide - if I get that far.

More comments are expected from NRR.

Junta Amel

Called ORNL (Dougan) 8/31 and instructed them to destroy the comments.
