

DOCKET NUMBER 32-70, 50, 70, 150  
PROPOSED RULE 140 FR 70574)  
SMELTED ALLOYS

Dec. 9, 1980

Secretary of the Commission  
U.S. N.R.C.  
Washington, D.C. 20545

Dear Sir,

Today a NRC News Release (NR-80-38) was given to me. I am appalled to find out that you are trying to ~~amend~~ NRC regulations to permit scrap metal contaminated with Tc-99 and low-enriched uranium to be recycled to persons without a license issued by you.

I urge you not to do this.

Low level radiation kills people. Spreading more radiation in this manner will increase deaths and is highly irresponsible.

I beg you to find ways to meticulously enclose and contain these radioactive metals and meticulously check their continued containment. Please I urge you to be responsible to ourselves, our children, our grand children and our earth.

I would like to know what ~~metals~~ products have already these "various metals" in them and see literature in which you have evaluated that

L-4-1 Pt 30

8108120609

less than one health effect would result  
from the radiation doses derived from recycled  
uranium enrichment plant scrap.

Please also explain to me what is meant by  
"one health effect".

Thank you kindly.

Sincerely,

Sandra C. Flint
