Re: ~~disregarding~~ medical and research waste
~~for disposal in public sewage systems~~

The thought of medical and research waste getting into our public water systems is totally repugnant to me, but the thought that these wastes will be radiation contaminated is totally devastating! What are you people doing to protect the American public!? The cumulative effect of each "small" addition to radiation exposure may not be revealed in your time, but your permissiveness will cause many lives to be shortened or snuffed out. Shame on you!
