Animal Carcasses

Gentlemen:

At a meeting today of an organization I belong to, a discussion arose pertaining to the deregulation of medical waste from research programs, etc. I protest the lessening of regulations on the premise that eventually these wastes will end up in the soil that grows crops and the water that people will drink.

Cumulatively, this nuclear waste material would endanger the health of all. I urge you not to deregulate!

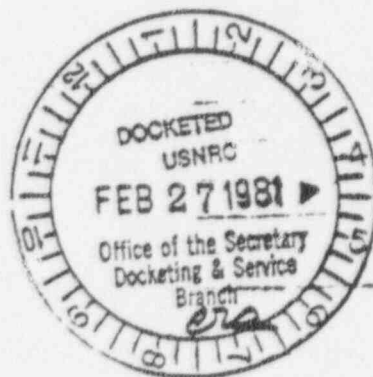

Yours truly,

Esther B. Bonner
