

DOCKET NUMBER 50-289
PROD. & UTIL. FAC.
1055 No. Fifth Street,
Reading, Pa. 19601
March 2, 1981

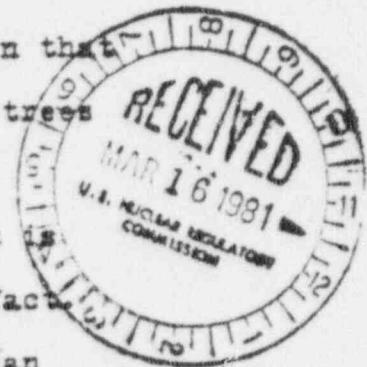

Ivan W. Smith, Chairman
Atomic Safety & Licensing Board
25 North Court Street
Harrisburg, Pennsylvania 17101

Dear Mr. Smith:

For many reasons, some listed below, I urge you and the Board to authorize the restarting of TMI-1 as soon as possible:-

1. It will result in a lowering of rates to consumers
2. Reduce our reliance on oil
3. Coal fired plants are producing acid rain that is already destroying our vegetation and trees also killing fish life.
4. The fears that many have of Atomic plants is physiological (mental) and not based on facts. No one has been killed as yet in or near an Atomic plant because of radiation.

Sincerely yours,

Harrison L.S. Deeter
Harrison L.S. Deeter, PE (ret)
