Chairman Leon Smith  
ASLB  
Nuclear Regulatory Comm.  
Washington, D.C. 20555

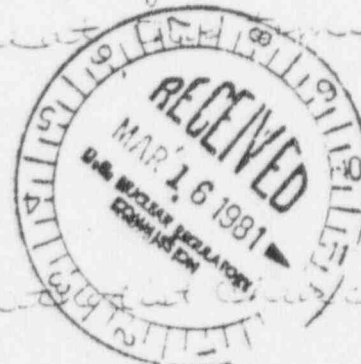

Dear Sir:

As a resident of the area, I  
do ask that you would not  
restart TMI-1. I have felt the  
pulse of people in this area; a  
pulse which says "no" to TMI.  
The dangers are economic as well  
as environmental.

I plead with you to consider  
the value of the humans who  
say "no" to TMI -- and that the  
influence of the armchair scientist  
would take a back seat.

Sincerely,

Rev. John Schmitt  
40 Bithany United Methodist Church
