Re: Application for License to Export Enriched UF6
and Natural UF6 for the Tsuruga Unit No. 2 Region 9

Dear Ms. B. Wright:

Please find enclosed our application for license to export slightly enriched UF6 and Natural UF6. This material will be used for the fabrication of fuel assemblies and ultimately loaded into Tsuruga Unit No. 2 (Region 9) owned by The Japan Atomic Power Company.

The contract for the uranium enriching services with the U.S. Department of Energy is DE-SC05-84UEJA202.

Please note that the The feed material is supplied by the U.S.A. and Canada.

The relevant enriched UF6 will be delivered at the U.S. D.O.E. Portsmouth Enriched Plant in Piketon, Ohio. After being exported to Japan, it will be converted to UO2 powder, pelletized and fabricated into fuel assemblies by Mitsubishi Nuclear Fuel Co., Ltd.

As to the validity of the export license, we wish to have a two year period from the date of issuance.

With regard to sampling, we request that one (1) P-10 tube sample be taken from each parent cylinder. This sample should be delivered to Mitsubishi International Corporation c/o Teledyne Isotope Inc., for independent analysis. We also request that E.P. Johnson Associates witness the weighing, sampling and loading operation.

Thank you for your attention to the above and should you have any questions, please call us at (212) 605-2158.
