Physical Security Plan
Shoreham Nuclear Power Station - Unit 1
Docket No. 50-322

Dear Mr. Denton:

LILCO letter SNRC-1172 dated May 21, 1985 submitted a Revision 10 to the Shoreham Physical Security Plan for NRC Staff review. Attachment III to that revision was intended to describe the measures LILCO would take to comply with 10 CFR 73.55 for the 20 MW gas turbine and the four GM-EMD diesels.

The Atomic Safety and Licensing Board Partial Initial Decision LPB-85-18 dated June 14, 1985 removes LILCO's need for Attachment III to Revision 10. Because Revision 10 has been formally incorporated into the Shoreham Nuclear Power Station Security Plan, LILCO requests that Section 2, Item E of Facility Operating License NPF-19 issued to LILCO on December 7, 1984, referencing the Shoreham Nuclear Power Station Security Plan, Revision 9, be revised to reflect Revision 10 with the stipulation that as a result of LPB-85-18, Attachment III need not apply.

Very truly yours,

Jeffrey A. Smith for
John D. Leonard, Jr.
