4/5/83

Tom,

Roger Blond alerted me to the attached material which may be of interest to you regarding the leak rate sensitivity study. It was presented by Jim Meyer, NRR, (492-4754) to the Senior SARP Review Group on 3/14/83.

By the way, I still have not received the final Form 189, including how and when Task #3 will be reported, and showing a more accurate FY83 Monthly Forecast Expense (bottom of pg 1).
