NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

TERA

March 18, 1981

Docket No. 50-298

Mr. J. M. Pilant, Director
Licensing and Quality Assurance
Nebraska Public Power District
P. O. Box 499
Columbus, Nebraska 68601

Dear Mr. Pilant:

On February 4, 1981, NRC contractor personnel, met with Mr. J. Sayer of your staff to discuss the environmental monitoring data for the Cooper Station. As a result of information provided at the meeting, we have prepared an updated list of materials needed for assessment of impacts of operation of the Cooper Station on the Missouri River aquatic biota. We have included a copy of the list and request that you provide directly to the contractor, Environmental Science and Engineering (ESE), a copy of the items which you have available or have access to.

The receipt of the list materials will greatly aid the review of the environmental monitoring programs which you have carried out since the commencement of operation of the Cooper Station.

Sincerely,

Thomas A. Ippolito
Thomas A. Ippolito, Chief
Operating Reactors Branch 2
Division of Licensing

Additional Materials Needed for
Cooper Station Environmental Appraisal
Report

1. ~~A drawing showing the stations' intake structure.~~
2. Results of studies or data describing the portion of the water column entrained by the station, i.e., results of the intake hydrology model.
3. Data on intake velocity as measured in the field, i.e., in the vicinity of the intake and near the curtain wall.
4. All original impingement data recorded during station operational periods.
5. Copies of station operational period (e.g., on-line, down-time, intake volume, generation level---etc.).
6. Industrial BIO-TEST Labs 1973

The evaluation of thermal effects in the Missouri River near Cooper Nuclear Station (Preoperational Phase), April 1972-March 1973. (IBT No. 64301700). Report to NPPD.
