General Comment

President Trump has a new hobby! Every few days he guesses how many Americans will die from Covid-19 and congratulates himself on the relatively low number:

April 20: Now we're going toward 50 -- I'm hearing, or 60,000... That's at the lower -- as you know the lower was supposed to be 100,000 people.

April 27: What we did is a great tribute to this country... But if we lose 65,000 people, and instead of that going the other route, we would have lost a million or a million and a half or 2 million.

April 29: And some of the facts are coming out, and we did all the right moves... And if you think that we'd be at 65 or 70 or 60 or whatever the final number will be...

May 3: That's one of the reasons we're successful, if you call losing 80 or 90,000 people

successful. But it's one of the reasons we're not at the high end of that plane as opposed to the low end of the plane.

President Trump, I believe I speak for many Americans when I ask you to stuff it.
