Section 303 of the Nuclear Waste Policy Act of 1982 requires the Secretary of Energy to undertake a study with respect to alternative approaches to managing the construction and operation of all civilian radioactive waste management facilities, including the feasibility of establishing a private corporation for such purposes. The Act requires the Secretary to consult with the Director of the Office of Management and Budget, the Chairman of the NRC, and such other Federal agency representatives as may be appropriate. The study is to be completed and the results submitted to Congress, within one year after the date of enactment of the Act (by January 7, 1984).

DOE has chartered and is presently in the process of selecting participants for the AMFM advisory panel which will be performing the required study. As part of the DOE/NRC consultation process for this study, NRC has been extended the opportunity to have a staff observer attend advisory panel meetings. Therefore, in accordance with the letter from Chairman Palladino to Secretary Hodel dated July 8, 1983, we are nominating Joseph O. Bunting to be the staff representative at these meetings. Meeting notes will be forwarded to you for transmittal to the Commission soon after the conclusion of each meeting. Should any questions arise concerning this activity please contact Robert E. Browning at extension 74200.

(Signed) John G. Davis
