DEPARTMENT OF  
ENERGY

December 17, 1992

Ivan Selin  
Chairman  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Chairman Selin:

I would like to invite Commission staff to attend a special meeting of Oregon's Energy Facility Siting Council to discuss matters related to the Trojan Nuclear Plant. The Siting Council has announced its intention to hold a special meeting in Portland, Oregon on the 5th and 6th of January, 1993. I have enclosed an agenda for your information.

Recent questions surrounding the matter of the Trojan Nuclear Plant steam generator tube cracking will be the subject of the meeting. In addition, we would like an opportunity to understand the concerns of two members of the NRC Research Office regarding stress corrosion cracking in PWR steam generators. Drs. Hopfenfeld, and Muscara of that Office have raised questions we wish to understand better as it relates to Trojan's steam generators. We would like to request their presence at this special meeting.

In addition, we would like the opportunity to ask questions of your technical and licensing staff in the Office of Nuclear Reactor Regulation.

The NRC's presence in many past meetings of the Council has been invaluable. My staff and yours have forged a working relationship that benefits everyone. My sincere thanks for your past and future support.

Sincerely,

*Christine A. Ervin*
