MAY 17 1985

Saratoga General Hospital
ATTN: Barbara Sagaert
Assistant Administrator
15000 Gratiot Avenue
Detroit, MI 48205

Ms. Sagaert:

Enclosed is Amendment No. 06 to your NRC License No. 21-16891-01 per your letter dated April 19, 1985. Please be advised of the following:

1. We did not delete Drs. Meir and Roco from your license since you do not have another qualified physician to use Group V materials. In order to continue your authorization to use Group V materials and delete the above physicians, you will need to submit documentation for a physician authorized to use Group V materials and request the addition of this physician to your license. Alternatively, you may request that we delete your authorization to use Group V materials.
2. In order to add David Barker, M.D. and Kyoung S. Bae, M.D. to your license, you will need to submit documentation of their training and experience using/handling radioactive material. Enclosed is a "Preceptor Package" (Supplements A and B) which should be completed by each physician and returned to our office. This enclosure also describes the acceptable training and experience for medical uses of byproduct material.

Information submitted in response to this letter should state that it is additional information and not a new amendment request. If you have questions, please contact our office by dialing (312) 790-5625.

Please review the enclosed document carefully and be sure that you understand all conditions. You must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Possess radioactive material only in the quantity and form indicated in your license.
3. Use radioactive material only for the purpose(s) indicated in your license.

8506100248 850517
REG3 LIC30
21-16891-01 PDR

4. Notify NRC in writing of any change in mailing address.
5. Request and obtain appropriate amendment if you plan to change ownership of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.
6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions and representations in your license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions or require clarification of any of the above stated information, contact us at (312) 790-5625.

Sincerely,

Original Signed By
Patricia J. Whiston
Materials Licensing Section

Enclosure(s):

1. Amendment No. 06
2. "Preceptor Package"
