SUBJECT: AMFM PANEL REPORT

Enclosed for your information is a copy of the final draft report of DOE's advisory panel. We are currently reviewing this report, with the assistance of ELD, RES, NRR, and OPE, to identify the impacts on NRC's regulatory role that could be expected if the Panel's recommendations were implemented.

DOE is planning to send the final draft to the Commission in late December for a brief consultation period. We have asked the other NRC offices to provide their comments on the report to us by December 28, and would appreciate receiving any comments you have by that date as well.

My only major comments are:  
In numerous places the unsupported assertion is made that a ~~part~~ corporate type organization would be more responsive to NRC than a part agency. It is not obvious to me that this is a fact. See, e.g. Ch III pg 13, Ch IX pg 6, and other dog-eared pages.

There also seems to be an incorrect underlying assumption that long term active monitoring will be required. See # Ch III pg 21. This may not be so.

There are some nit picking comments on other dog-eared pages.
