DOCKET NUMBER
PROD. & UTIL. FAC. 50-466

Secretary to the Commission
U. S. Nuclear Regulatory Commission
Washington DC 20555
(attn: Docketing and Service Branch)

We oppose the speed-up being given to the licensing process for for Texas nuclear powerplants at Commanche Peak and Bay City. The nuclear and fossil-fueled industry in Texas has had more than thirty years to propogate lies about nuclear power being "clean, cheap and safe." The people of Texas now know better. So we need more time to open up the information process sufficiently to get more people informed about the negatives of nuclear power. We need more time to prepare our case because the nuclear industry has had so many years to make theirs through our local press, most of which they control.

Sincerely,

Newton and Muffin Ellison
