Re: Amendment to License Number 13-02650-02.

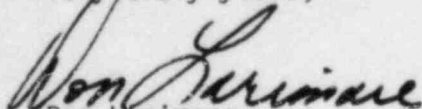

Gentlemen:

Please amend our license to include the name of Ronald A. Sapiante, M.D., to the users list for Group VI Radioactive Materials. Dr. Sapiante is a licensed physician in the State of Indiana and is joining our staff as a radiation oncologist.

Since Dr. Sapiante has been working in an Agreement State (Alabama) of the NRC, we therefore cannot supply you with an NRC license number to substantiate his previous training and experience. However, in discussions with the NRC staff by phone, it was stated that a copy of his board certification in therapeutic radiology would be sufficient proof of his training and experience in using radioactive sources listed in Group VI. I have also included his Curriculum Vitae and radioisotope permit issued by the University of South Alabama.

If additional information is needed on this amendment request, please contact John D. Scheu, Ph.D., (219) 287-4146. Enclosed please find the amendment fee of \$120.00.

Very truly yours,

Don Larimore
President
