Dear Dr. Cohen:

Subject: Routine Inspection No. 030-19953/92-002

On November 10 and 11, 1992, an NRC inspection of activities authorized by NRC License No. 20-20592-01 was conducted at your facility in Hopkinton, Massachusetts. Following that inspection, CAL No. 1-92-015 was issued to you on November 12, 1992. You responded in letters dated November 12, 16, 17 and 20, 1992. CAL No. 1-92-015 was amended on November 19, 1992.

As discussed during a telephone conversation between Dr. Victor Jegede of your staff and Mr. John Kinneman of this office on December 3, 1992, and further discussed by Dr. Ronald Bellamy and Mr. Kinneman of this office in a telephone conversation with Ms. Donna M. Laviolette of your staff on December 14, 1992, a Management Meeting will be held at the NRC Region I Office at 475 Allendale Road, King of Prussia, Pennsylvania at 1:00 p.m. on December 21, 1992. Directions to our office are enclosed. We understand that you and other members of your staff will attend this meeting. As explained during the telephone conversation on December 14, 1992, our review of the facts associated with the apparent violations identified during this inspection is not yet complete; therefore, we will not provide a written report prior to the meeting. However, we plan to discuss your responses to CAL No. 1-92-015 and completed and proposed corrective actions, including your actions to strengthen management control over the use of licensed materials. We understand that you will describe the results of your independent audit and the changes to your radiation safety staff at this meeting. The proceedings of the meeting will be recorded.

In accordance with Section 2.790, of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter will be placed in the Public Document Room.
