Hobart, Ind.

Dear Mr. Hendrie,

I am a third grade teacher
+ am often concerned about
the increase of hyperactivity
in children in recent years

The thought of what
radiation leaks could do
to our future generations
is, at the least, sobering, at
the most, terrifying.

It seems to me the
only responsible + prudent
thing to do for our children
+ their children is to halt
work on nuclear plants
until technology is better
+ a method is found to destroy
or render harmless the nuclear
waste created by these plants.

H

My immediate concern is
stopping the construction of the
Bailly Nuclear Plant but
would hope that governments
abroad would get behind
solar research.

Sincerely,
Shirley Johnson
