Cottage Hospital of Grosse Pointe
ATTN: Ralph L. Wilgarde
Administrator
159 Kercheval Avenue
Grosse Pointe Farms, MI 48236

Gentlemen:

Enclosed is Amendment No. 07 renewing your NRC License No. 21-16425-01 in accordance with your request.

Please note that 10 CFR Part 35 has been revised effective October 12, 1982. This revision requires a representative of the nursing staff to be on the Medical Isotopes Committee. In view of this new requirement, you should appoint a member of your nursing staff to your Medical Isotopes Committee immediately.

Concerning the new authorized users listed on your license, David H. Barker, M.D. was informed on May 24, 1985, that each physician would be listed only for those materials which were listed on their preceptor forms.

Enclosed is a Federal Register notice that concerns revised training and experience criteria for physicians who request authorization to use reactor produced radioactive isotopes (byproduct material) in nuclear medicine procedures, including cardiovascular nuclear medicine.

Several new conditions have been incorporated in your license. In view of this, please review your license carefully to assure that you understand and are in compliance with the terms and conditions contained therein. If you have questions, please contact our office by dialing (312) 790-5625.

Please review the enclosed document carefully and be sure that you understand all conditions. You must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Possess radioactive material only in the quantity and form indicated in your license.
3. Use radioactive material only for the purpose(s) indicated on your license.

MAY 31 1985

4. Notify NRC in writing of any change in mailing address.
5. Request and obtain appropriate amendment if you plan to change ownership of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.
6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions and representations in your license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions or require clarification of any of the above stated information, contact us at (312) 790-5625.

Sincerely,

Original Signed By
James R. Mullauer
Materials Licensing Section
