Dear Sir:

Please consider revision to our materials license number 21-08678-04. The revisions necessary are in our manual of operating and emergency procedures.

Under section I administration part A, please change the Radiation Safety Officer to Donald W. Brewster and delete any reference to Mr. Carter. Mr. Brewster's title is General Supervisor Metallurgical and has a degree in Metallurgical Engineering from Wayne State University in Detroit, Michigan and nearly 20 years experience with radiography at Saginaw General Motors foundries. Also under this part Mr. Dave Johnson should be listed as plant manager. Under part A-2 Mr. William Harper should be listed as the Area Supervisor with him reporting to Mr. Brewster.

Under attachment "I" part 2 second paragraph should read as follows: Minor personnel exposure is only possible from inside the cupola during repairs. To safeguard against any exposure, the sources shutters will be in the closed position before anyone enters the cupola to make repairs.

Section III attachment F item 5 should be revised to read as attached.

Respectfully Submitted

Donald W. Brewster
DONALD W. BREWSTER
Radiation Safety Officer
Nodular Iron Plant
