RE; Stipulations for Procedures # 28 (Amended), # 37, # 39

Dr. Glenn;

The following conditions shall be observed;

Procedure # 39 Access to the New Cell shall be restricted during drum moving operation by direct supervision of operational personnel. At the completion of the operation the door system shall remain locked to restrict access.

Procedure # 28 Air sampling will be performed on a daily basis during operations and documented on a daily basis.

Procedure # 37 Personnel to perform operations will be suited in full-face respirators and hooded secondary Tyvec suit. A third layer of poly laminated Tyvec suiting shall be worn, which is waterproof. Both secondary and third waterproof layer shall be remanded to the Enclosure.

Any further questions may be directed to my attention.

Sincerely,

Bruce J. Thomas
