Dear Mr. Semnani:

Enclosed is a copy of the Nuclear Regulatory Commission staff's revised safety and environmental review schedules for your license application that was briefly discussed during our meeting of December 21, 1992. As we stated in the meeting, this review schedule is based on past performance and revalidation of existing milestones and scheduled dates. The current NRC review schedule results in the issuance of the license by November 1993. This revision to the schedule includes a slip in the safety review schedule due to the considerable additional time my staff has had to devote to the environmental review these past months. It should be noted, however, that the projected completion date will depend, to a significant extent, on how quickly remaining open licensing issues can be resolved.

My staff and I will work with you and Envirocare in resolving these open issues in a timely manner.

Sincerely,

ORIGINAL SIGNED BY

John J. Surmeier, Chief  
Uranium Recovery Branch  
Division of Low-Level Waste Management  
and Decommissioning  
Office of Nuclear Material Safety  
and Safeguards
